Infant Mortality CoINN – Individual Measurement Worksheet
EXAMPLE

Instructions: Complete this worksheet for each potential measure to plan data collection and to assist in determining its feasibility and link to the project's Aim.

Name of CoINN:		**State Team** *(if applicable):*	
Aim:			
Measure:			
Target Measure:			
Population:			
What do we need to obtain this measure and monitor it?			
Interval/Frequency of Data Collection			
Proposed measure start and stop periods	*Baseline:*	*Start date:*	*Stop date:*
	Post Intervention:	*Start date:*	*Stop date:*
Explain how this measure supports the CoINN team's ability to understand progress toward and impact on the Aim			
Rate the measure as to progress and impact on the Aim *(circle one):*	*High impact*	*Medium Impact*	*Low Impact*
			* If Medium or Low Impact, consider eliminating.
Explain the expected burden or effort of collecting data for this measure			
Rate the data collection's burden or effort *(circle one):*	*High burden/effort*	*Medium burden/effort*	*Low burden/effort*
			* If Medium or High Burden/Effort, consider eliminating.
Explain time lag between making a change to the system and seeing evidence of change in the measure			
Data Source:			
Exclusions:			

Infant Mortality CoINN – Individual Measurement Worksheet
EXAMPLE

Sampling plan:	
Who will enter data on platform and prepare/ share reports with the team/stakeholders? *(DATA team will create graphs)*	

Calculation:

Describe the Numerator

-- **X**   **100**   **=** ____ Percent

Describe the Denominator

Notes:
